## **HATCO® CORPORATION NEWS RELEASE**

### **Get Cooking and Heating Versatility with the Round Heated Well**

Milwaukee, WI (May 5, 2016) – Get the flexibility of a foodwarmer, soup kettle, Bain-Marie heater, steamer and pasta cooker all in one unit with the new Hatco® Round Heated Well.

The multi-purpose, dry Round Heated Well features a heating element temperature that is monitored by an electronic controller for optimum results; food products for cooking or holding are placed in a food pan, which is heated or warmed by the heating plate. Heat is evenly distributed throughout the RHW to hold foods at desired temperatures, while the insulated stainless steel design provides easy maintenance and durable performance.

The Round Heated Well is equipped with a control panel that features three temperature setpoints for warming, steaming and boiling and with a low-power mode that guarantees increased energy efficiencies during off-peak hours. The Freestanding Round Heated Well is available as a single model (one 11-quart round pan) or as a dual model (two 11-quart round pans) with individually-controlled pans. A single built-in model (one 11-quart round pan) is available, as well.

For additional information on Hatco Round Heated Wells and other equipment, contact your Hatco sales representative or visit the Hatco website at <http://www.hatcocorp.com>.

###

Hatco Corporation is a Milwaukee, Wisconsin-based, employee-owned company with a history of over 65 years of excellence in the quality design, production and servicing of holding, warming and, since 2009, cooling equipment. Today, Hatco now has the versatile and innovative Drop-In Hot/Cold Wells and Hot/Cold Built-In Shelves, incorporating the legendary Hatco quality of warming and cooling into one unit.
