

## HATCO® CORPORATION PRODUCT RELEASE

### Hatco's Rapide Cuisine® Built-In Induction Range Provides the Ultimate Cooking Surface

The Rapide Cuisine® Built-In Induction Range from Hatco® Corporation mounts flush with the countertop for a seamless look, while its unique Magnetic Power System (MPS) provides maximum cooking and holding power compared to other units. Designed and built to handle the rigors of commercial foodservice use, the built-in Rapide Cuisine features an advanced programmable mode to create preset menu items for consistent cooking cycles – and quality product! – and a USB port below the control panel for downloading updates and adding modes. The IRNG-PB1 models have other features for your safety and convenience, including: an automatic shut-off; Pan Sense Technology (PST), which allows the range to sense when a compatible pan is placed on top to activate the unit; and a high resolution color TFT display that communicates precise power, temperature and timer settings.
