

## HATCO® CORPORATION PRODUCT RELEASE

### **Hatco's Intelligent Toast-Qwik® Narrow Conveyor Toaster Is the Smartest Toaster Around**

Hatco® Corporation is presenting the new Intelligent Toast-Qwik® Narrow Conveyor Toaster, which has the ability to toast multiple bread products, as well as finish smaller food products, at the touch of a button. The narrow design allows for continuous single-slice toasting and for the unit to fit into smaller areas, conserving countertop space. Easily operable with four different toasting modes, the narrow ITQ provides energy efficiency and cost savings with Spot-On® Technology, which allows the toaster to sense when a product is placed on the conveyor belt to activate the unit, and a Power Save mode. The Intelligent Toast-Qwik also has a programmable touchpad that holds up to 18 product settings, with a USB port located on the front for easy transfer of product information.
