

HATCO® CORPORATION PRODUCT RELEASE

Upscale Your Offerings with Glo-Rite® Curved Display Lights

Hatco® Corporation is introducing the Glo-Rite® Curved Display Lights as the stylish equipment solution for enhancing your serving areas. The display lights feature a patented curved design and offer LED lighting for the highest light output ideal for illuminating food products. The sleek housing is unobtrusive, using a small footprint and allowing greater visibility of the food below. The energy-efficient dual LED lights guarantee longer performance and deliver significant savings with lower energy consumption and greater reliability – compared to standard incandescent bulbs. The HL5 models use either a warm white light (3050K), or a cool or neutral white light (4100K) for improved light coverage. The Glo-Rite Curved Display Lights are available in many lengths and in a variety of housing colors to match your décor.
