

## HATCO® CORPORATION PRODUCT RELEASE

### Drop-In Dry Slim Heated Wells Keep Food Warm – Without Water!

An insulated, full-sized well that is grouped in a modular fashion, but placed lengthwise, the Drop-In Modular/Ganged Dry Slim Heated Well from Hatco® Corporation keeps hot foods at consistent holding temperatures for extended periods. Using dry convected heat, the uniform convected airflow consistently surrounds each food pan for efficient heat transfer. The DHWBI-S features compact individual thermostatic controls for temperature regulation of each well and a separate On/Off switch to retain settings. It also offers increased design flexibility and reduced installation costs due to the lack of plumbing restrictions. With a  $\frac{3}{4}$ " NPT brass drain, easy cleanup is guaranteed and it provides additional protection to the motor and fan from any liquids that might accumulate in the well. Available in 2- to 4-ganged units.
