## **HATCO® CORPORATION NEWS RELEASE**

### **The Intelligent Heated Display Cabinet Keeps Your Customers' Attention on the Food – Guaranteed**

Milwaukee, WI (May 17, 2019) – Hatco® Corporation is introducing the Intelligent Heated Display Cabinet with Humidity as the perfect way to showcase your foods and increase impulse sales.

The Intelligent Heated Display Cabinet regulates air temperature and simultaneously balances humidity levels to provide the best environment for holding pizzas and other food products. A 360° view and energy efficient LED lighting keep the focus on the product.

The air flow pattern of the unit is designed to maintain consistent cabinet temperature without drying out the food, while the air flow rate enables the cabinet to recover temperature rapidly after opening and closing the doors. The cabinet features an LCD touchscreen display on the back that controls temperature, humidity and timers for each food location, as well as a USB port on the back to establish standard, pre-programmed settings for consistency and reliability.

The IHDCH is available in standard Stainless Steel or optional *Designer* Black to match your décor. The IHDCH-28 has a full door in the back, with an optional door in the front to allow for self-service, and the IHDCH-45 has sliding rear doors. Accessory adjustable arms – and shelves for the IHDCH-28 – allow for different food displays, with accessory sign holders available.

For additional information on the Hatco Intelligent Heated Display Cabinet with Humidity and other equipment, contact your Hatco sales representative or visit the Hatco website at <https://www.hatcocorp.com>.

###

From the corporate offices in Milwaukee to the state-of-the-art manufacturing facility in Sturgeon Bay, Wis., Hatco Corporation is a proud employee-owned company. Since 1950, Hatco has a history of excellence in the quality design, production and servicing of warming, toasting, holding, cooking, sanitizing and cooling equipment. Today, Hatco has introduced the versatile Hot/Cold Built-In Shelves and Palletti™ Induction Warmers into its extensive line of innovative foodservice equipment.
