HATCO® CORPORATION NEWS RELEASE

Drop-In Round Insulated Heated Wells Deliver Flexibility and Quality

Milwaukee, WI (May 4, 2018) – With a variety of configurations available to suit your operation's needs, Hatco® Corporation's new Drop-In Round Insulated Heated Wells hold hot and fresh foods at safe-serving temperatures.

Designed for both wet and dry operation, the HWBI-QT has fully insulated construction to ensure better heat retention for product quality and more consistent holding times, to conserve energy and to provide cooler surrounding surfaces for customer safety. Self-adjusting thermostats read the actual temperature of the well and add heat only when needed.

A separate lighted On/Off rocker switch and a temperature dial, which allows pre-set temperatures to be maintained, are included. A 50% larger drain with flat screen simplifies cleaning and holds pans levels, while the design allows for easy service access to the heating elements and thermostats.

The Drop-In Round Insulated Heated Wells are available in 4-, 7- and 11-quart (4-, 7- and 10-liter) round wells, with a drain and/or auto-fill and in high watt. Mounting kits are available for combustible countertops.

For additional information on the Hatco Drop-In Round Insulated Heated Wells and other equipment, contact your Hatco sales representative or visit the Hatco website at <https://www.hatcocorp.com>.

###

From the corporate offices in Milwaukee to the state-of-the-art manufacturing facility in Sturgeon Bay, Wis., Hatco Corporation is a proud employee-owned company. Since 1950, Hatco has a history of excellence in the quality design, production and servicing of warming, toasting, holding, cooking, sanitizing and cooling equipment. Today, Hatco has introduced the Drop-In Modular/Ganged Dry Heated Wells and Rapide Cuisine® Induction Ranges into its extensive line of innovative foodservice equipment.
