HATCO® CORPORATION NEWS RELEASE

Hatco Heated Base Glass Shelves Offer Stylish Foodwarming

Milwaukee, WI (Feb. 1, 2019) – Hatco® Corporation's Heated Base Glass Shelves now offer the option of choosing between black or white ceramic glass to match your décor.

The heated ceramic glass creates a uniform heat across the entire surface, making it the ideal foodwarmer for keeping foods at safe-serving temperatures. The ceramic glass is made of approved foodsafe materials, allowing for placement of the food products directly on the glass.

The HBG is available as both portable and built-in. Adjustable thermostatic controls allow for easy control of the surface temperature, with a range of 100°F-195°F (38°C-90°C) for portable models and 100°F-200°F (38°C-93°C) for built-in models. All models are equipped with a trim mounting ring, available in standard Stainless Steel, *Designer* Black or White. The portable models also offer an optional angled food stop, which keeps product on the heat zone.

For additional information on the Hatco Heated Base Glass Shelves and other equipment, contact your Hatco sales representative or visit the Hatco website at <https://www.hatcocorp.com>.

###

From the corporate offices in Milwaukee to the state-of-the-art manufacturing facility in Sturgeon Bay, Wis., Hatco Corporation is a proud employee-owned company. Since 1950, Hatco has a history of excellence in the quality design, production and servicing of warming, toasting, holding, cooking, sanitizing and cooling equipment. Today, Hatco has introduced the Intelligent Heated Display Cabinets and Palletti™ Induction Warmers into its extensive line of innovative foodservice equipment.
