

HATCO® CORPORATION PRODUCT RELEASE

Hatco Expands Induction Offerings with Palletti™ Induction Warmers

Hatco® Corporation's Palletti™ Induction Warmers offer a safe, efficient and attractive way to safely keep food hot in commercial kitchens, as well as serving applications. The Palletti warmers have five precise low to high power warming levels – that are memory retentive – to suit a wide variety of food types and volumes. The control panel features an On/Off button with an LED indicator light and two buttons to control the power settings, guaranteeing a simple, energy efficient and quiet operation. No open flames and an automatic shut-off also enhance both operator and public safety. The 600W countertop and built-in warmers have a greater power for larger volume applications; the 360W countertop warmers allow multiple units to be interconnected to one electrical outlet.
