

# HATCO® CORPORATION PRODUCT RELEASE

## Expand Menu Offerings with the Hatco Snack System

Hatco® Corporation has teamed up with Suntec Corporation to create the Snack System. With a single or dual electric baker, operators can use the one-touch release with latch opener to easily switch the Snack System's replaceable plates to serve breakfast items, lunch foods and an assortment of snacks in between. Adjustable time and temperature controls allow for multiple menu options, so you can freshly bake as many or as few items as you need – resulting in no waste at the end of the day. The Snack System comes with standard round Belgian waffle plates and an additional set of plates of your choosing: freestyle, coffee bean, sandwich, panini, donut or chelky. All plates are easily cleaned with warm, soapy water.
