

## HATCO® CORPORATION PRODUCT RELEASE

### With Electric Waffle Makers, Waffles Aren't Just for Breakfast

Together in their commercial partnership, Hatco® Corporation and Krampouz® are proud to offer Electric Waffle Makers. With a thermostatic control and a temperature range of 120°F to 570°C (50°C to 300°C), operators can warm up pre-made frozen product or cook fresh waffles from their own batter. Insulated heating elements create an even heat distribution across the surface of the plates, resulting in delicious waffles. The KWM has a durable stainless steel frame and a drip tray for waste recovery. The innovative Easy Clean System® allows for instant removal of the waffle irons, giving you ease of maintenance and cleaning. Models are available with a 90° or 180° hinged opening with Liege or Brussels cast iron waffle plates, which are dishwasher-safe.
