

## HATCO® CORPORATION PRODUCT RELEASE

### Create the Perfect Crepe with Electric Crepe Makers

Together in their commercial partnership, Hatco® Corporation and Krampouz® are proud to offer Electric Crepe Makers. Coiled and insulated heating elements create an even heat distribution across the surface of the plate, resulting in delicious crepes. A thermostatic control with a range of 120°F to 570°C (50°C to 300°C) allows for operators to cook quality crepes from a variety of different batters. The 120 volt KCME-1RND model can be used for up to five hours continuously, while the heavy-duty Crepe Makers are powerful for a full day of use during breakfast, lunch and beyond. The KCME has a durable stainless steel frame and includes a spreader and a spatula. Models are available with a single or double griddle with a round or rectangular frame.
