## **HATCO® CORPORATION NEWS RELEASE**

### **Create the Perfect Crepe with Electric Crepe Makers**

Milwaukee, WI (May 17, 2019) – Together in their commercial partnership, Hatco® Corporation and Krampouz® are proud to offer Electric Crepe Makers, ideal for professional use in commercial kitchens and display cooking locations.

Coiled and insulated heating elements create an even, perfect heat distribution across the surface of the plate, resulting in delicious crepes for serving. An adjustable thermostatic control with a range of 120°F to 570°C (50°C to 300°C) allows for operators to cook quality crepes from a variety of different batters. The 120 volt KCME-1RND model can be used for up to five hours continuously, while the heavy-duty Crepe Makers are powerful for a full day of use during breakfast, lunch and beyond.

The KCME has a durable stainless steel frame and includes a spreader and a spatula.

Models are available with a single or double griddle with a round or rectangular frame. Griddle diameters are 15.75" (400 mm).

For additional information on the Hatco/Krampouz Electric Crepe Makers and other equipment, contact your Hatco sales representative or visit the Hatco website at <https://www.hatcocorp.com>.

###

From the corporate offices in Milwaukee to the state-of-the-art manufacturing facility in Sturgeon Bay, Wis., Hatco Corporation is a proud employee-owned company. Since 1950, Hatco has a history of excellence in the quality design, production and servicing of warming, toasting, holding, cooking, sanitizing and cooling equipment. Today, Hatco and Krampouz have also introduced Electric Waffle Makers to Hatco's growing line of innovative light cooking equipment.
