## **HATCO® CORPORATION NEWS RELEASE**

### **Simplicity and Power Are Yours with the Boxer™ Induction Range**

Milwaukee, WI (Jan. 8, 2020) – Hatco® Corporation is adding the Boxer™ Countertop Induction Range to its extensive induction line for operators who want a no frills, but still powerful, induction unit.

With heavy gauge stainless steel housing and side impact protection, the Boxer is built to handle the rigors and performance of commercial foodservice use. Though the Magnetic Power System (MPS) delivers the highest power possible, this induction range is simple to operate. Using a large control knob that is adaptive and adjusts to user input, the display instantly advises the operator of precise power, temperature and time control.

The black glass-ceramic top is durable, easy to clean and fully sealed with conformal-coated boards for extra protection against grease and moisture. Other standard features of the IRNG-BXC1 models include: an energy-saving automatic shut-off to prevent overheating; a compatible pan detection; and an ultra-quiet cooling fan, making the unit suitable for front-of-the-house use.

For additional information on the Hatco Boxer Countertop Induction Ranges and other equipment, contact your Hatco sales representative or visit the Hatco website at <https://www.hatcocorp.com>.

###

From the corporate offices in Milwaukee to the state-of-the-art manufacturing facility in Sturgeon Bay, Wis., Hatco Corporation is a proud employee-owned company. Since 1950, Hatco has a history of excellence in the quality design, production and servicing of warming, toasting, holding, cooking, sanitizing and cooling equipment. Today, Hatco has introduced the Snack System and Electric Waffle Makers into its extensive line of innovative foodservice equipment.
