

HATCO® CORPORATION PRODUCT RELEASE

Revolutionize Your Carry-Out Program with the Flav-R 2-Go®

Hatco® Corporation's Flav-R 2-Go® Locker System redefines the customer experience for to-go and delivery order pick-up. The food holding lockers conveniently hold multiple hot or ambient food orders for up to 45 minutes with quick and secure access. Customers and delivery drivers can arrive, access their specific locker and leave without waiting in line or disturbing the flow of business. The F2G is available as a countertop, built-in or floor-mount model and with pass-through or one-sided access. On pass-through models, the customer side stays locked until the customer enters their access code, in which LED lights will flash in the appropriate locker and the door will unlock.
