## **Revolutionize Your Carry-Out Program with the Flav-R 2-Go®**

**Milwaukee, WI – July 1, 2020** – Hatco® Corporation's Flav-R 2-Go® Locker System redefines the customer experience for to-go and delivery order pick-up.

Hatco® Flav-R 2-Go® Locker System  
Model **F2G-24-A** (Floor Mount)

The food holding lockers conveniently hold multiple hot or ambient food orders with quick and secure access. Customers and delivery drivers can arrive, access their specific locker and leave without waiting in line or disturbing the flow of business.

Each locker features a timer to hold packaged foods for up to 45 minutes. The lockers are preset at 150°F (66°C), with a high-temperature range up to 180°F (82°C), and individual lockers can have the heat turned off for ambient food holding.

The F2G is available as a countertop, built-in or floor-mount model and with pass-through or one-sided access. On pass-through models, the customer side stays locked until the customer enters their access code, in which LED lights will flash in the appropriate locker and the door will unlock.

The Flav-R 2-Go is available in all *Designer* colors to match your decor, in two locker depth sizes, and with the ability to have a custom logo on the customer-side glass doors.

For additional information on the Hatco Flav-R 2-Go Locker System and other equipment, contact your Hatco sales representative or visit the Hatco website at <https://www.hatcocorp.com>.
