Hatco's Flav-R 2-Go® Pizza Locker System Changes the Carry-Out Pizza Game

Milwaukee, WI – September 1, 2021 – As the popularity of take-out continues to grow, Hatco® Corporation is adding to its line of delivery and to-go equipment solutions with the new Flav-R 2-Go® Pizza Locker System.

Hatco® Flav-R 2-Go® Pizza Locker System
Model **F2GP-14-C** (Floor Mount) shown
with optional QR code reader

The pizza lockers conveniently hold multiple hot pizza orders with quick and secure access. Each locker has a timer to hold pizzas for up to 45 minutes and is preset at 149°F (65°C), with a high temperature range up to 180°F (82°C). The heat can be turned off for ambient food holding, as well.

Ideal for handling carry-out and third-party delivery orders in a non-contact manner, customers can arrive, access their specific locker, and leave without waiting in line or disturbing the flow of business. The locker system features a touchscreen on both the operator and customer sides. The operator inputs the customer's name and code for their order; the customer receives the code, enters it, and the appropriate door unlocks and rises to access the pizza boxes. An optional QR code reader is available, as well.

The Flav-R 2-Go is available as a built-in, countertop or floor mount model, in all *Designer* colors to match your décor, and with the ability to have a custom logo on the customer-side glass doors. The F2GP and F2GBP models come standard with manual operation; POS integration capabilities are available with outside vendor setup.

For additional information on the Hatco Flav-R 2-Go Pizza Locker System and other equipment, contact your Hatco sales representative or visit the Hatco website at <https://www.hatcocorp.com>.
