

## PRODUCT RELEASE

# The Most Flexible Piece of Equipment You Will Never Notice

When you need a beautiful, flexible and simple solution for hot food holding, you need Hatco® Corporation's new Maskerade™ Undercounter Induction Warmer. The Maskerade can be mounted under various countertop materials, including engineered and natural stone, so that it is completely concealed and "invisible," creating an appealing display and allowing for added countertop space for multi-purpose convenience. The warmer includes a black flexible, highly slip-resistant trivet which locates the chafing dish and protects the stone from the heat of the pan. The IWRM-UT model has five precise, memory-retentive low- to high-power warming levels that suit a wide variety of food types. It also features a control panel with a standby key, temperature control arrow keys, a lock key and temperature setting indicators.
