

HATCO® CORPORATION PRODUCT RELEASE

Hatco's Rapide Cuisine® Takes Induction Cooking to the Next Level

Hatco® Corporation is proudly introducing its line of sleek, modern, low-profile Rapide Cuisine® induction range. Designed and built for the durability and performance of commercial foodservice use, there are two types of Rapide Cuisine ranges available to suit operator needs and working environments – heavy-duty (“H”) and programmable (“P”) – with countertop and built-in models available. The IRNG utilizes a Magnetic Power System (MPS) for producing the highest power possible and has many great features, including an energy-saving automatic shut-off and Pan Sense Technology (PST) to turn on the range only when a compatible pan on top of the unit is detected. Easy-to-use power and temperature controls plus a timer are available (depending on the model), and all Rapide Cuisine ranges feature a high resolution TFT color display.
