

# HATCO® CORPORATION PRODUCT RELEASE

## Remote Refrigerated Slim Drop-In Wells Offer an Efficient and Easy Operation

Hatco® Corporation's Refrigerated Slim Drop-In Wells, which blanket pre-chilled food products to retain optimum freshness and taste, are now available in remote configurations to offer design flexibility. The Remote Refrigerated Slim Drop-In Wells are available in 1 to 4 full-size pan configurations. Because the pans are placed lengthwise in the well, customers have easy, reachable access to the food products, even with sneeze guards in place. The wells feature optimal and environmentally-friendly insulation on the sides and bottom for better cold retention and cost savings, as well as auto-defrost. The CWBR-S models include a remote-mounted condensing unit and control panel for installing in more convenient and desirable locations; the CWBX-S models include only a remote-mounted control panel for increased flexibility of multiple cold well configurations.
