Cook Up Flipping Amazing Waffles With the Flip Waffle Maker from Hatco®

Milwaukee, WI – May 19, 2022 – Hatco® Corporation has teamed up with Suntec Corporation to create the Flip Waffle Maker, which is designed for many hours of continuous, everyday use in commercial kitchens, buffets and display cooking applications.

Hatco® Flip Waffle Maker

Model **FWM-1B**

Featuring an exclusive heating element design and a 180° swivel mechanism that provides exceptional heat distribution throughout the entire cooking plate, the flip waffle maker cooks deliciously perfect Belgian waffles in minutes. Fast initial heat up time, excellent heat retention and recovery deliver high productivity and consistent results.

With adjustable time and temperature, operators can easily 'dial in' the perfect cooking profile for their particular operation or use different batters to expand menu offerings. A simple push button control panel with an LED display shows timer, temperature and status information, while a beeper signals the end of a cooking cycle.

The FWM comes standard with a 7" (178 mm) diameter round waffle plate. An accessory waffle plate to cook four mini round waffles that are 3⁵/₃₂" (80 mm) in diameter is also available.

For additional information on the Hatco Flip Waffle Maker and other equipment, contact your Hatco sales representative or visit the Hatco website at <https://www.hatcocorp.com>.
