Hatco® Corporation Brings the Power of Induction to Meet Your Hot Food Well Needs

Milwaukee, WI – January 27, 2023 – Hatco® Corporation is expanding its extensive induction line for foodservice operations by introducing the Drop-In Induction Dry Well.

Hatco® Drop-In Induction Dry Well

Model **IWELB-FUL-A** with a 2.5" (64 mm)
deep food pan

The Drop-In Induction Dry Well utilizes induction technology to offer an energy-efficient, plumbing-free solution for safely keeping hot foods fresh and at optimum serving temperatures. With a durable and tough glass-ceramic well bottom that can be easily adjusted to accommodate a 2.5" or 4" (64 or 102 mm) deep food pan, the well evenly and consistently heats the pan to maintain food's "just-made" quality.

The IWELB model includes two heat zones, with two temperature probes per zone, and an easy-to-use control panel with arrow keys to adjust the unit's temperature in Fahrenheit, Celsius or by the five preset temperature levels between 150°F and 210°F (66°C and 99°C).

The induction dry well, which is designed to be top or bottom mounted into a countertop, features a sensor that prohibits the unit from turning on unless a pan is present. A combination of full-size, half-size, third-size and quarter-size stainless steel food pans can be used in the well.

For additional information on the Drop-In Induction Dry Well and other equipment, contact your Hatco sales representative or visit the Hatco website at <https://www.hatcocorp.com>.
