Hatco® Corporation Adds Stylish Dekton® Stone Surface Finishes to Color Offerings

Milwaukee, WI – March 2024 – Hatco® Corporation is now offering three Dekton® stone surface finishes for the GRSS Glo-Ray® Portable Heated Stone Shelves and the HCSSB Hot/Cold Built-In Simulated Stone Shelves.

Dekton is a sophisticated mixture of over 20 minerals extracted from nature. Dekton stone can withstand abrasion better than granite or porcelain. The sintering and compression techniques used to manufacture Dekton make the surface completely non-porous and resistant to water and stains, which can be removed easily with standard cleaning products.

Dekton is a carbon-neutral, ultra-compact product and is abrasion, impact, scratch, and heat-resistant.

The GRSS and HCSSB models are now available in optional Domoos, Rem and Soke stone surfaces. Models are available in 120, 220, 230 or 240V. For additional information on Dekton and other equipment, contact your Hatco sales representative or visit the Hatco website at <https://www.hatcocorp.com>.
