# Remote Refrigerated Drop-In Wells

Models: CWBR-1, -2, -3, -4, -5, -6  
CWBX-1, -2, -3, -4, -5, -6

Hatco's Remote Refrigerated Drop-In Wells keep pre-chilled food products at safe serving temperatures but in remote configurations that offer more flexibility in your particular dining design needs. Unique top angled inside wall design allows cold air to effectively blanket your food product to keep food optimally cold and fresh.

## Standard features

- Top mount unit holds full-size pans in 1- to 6-pan configurations
- NSF 7 approved cold wall construction utilizes a refrigerant that keeps food product cold without drying it out

The unique angled inside wall design provides easy access and clear views. The greater surface area of the angled wall and the placement of the coils allow cold air to more effectively blanket your food product.

- Auto-defrost is activated through an advanced electronic controller programmed at the customer location
- 1" NPT brass drain simplifies cleaning
- Matches the Hatco line of Wells for a full integrated look
- **CWBR-S models only:**
  - Condenser utilizes R-513A refrigerant
  - Include a condensing unit (shipped loose – can be field mounted up to 50' [15.24 meters] of tubing from unit) and control panel (shipped loose – probe wires are 9' [2.7 meters]) for installing in more convenient or desirable locations
- **CWBX-S models only:**
  - Includes a control panel (shipped loose – probe wires are 9' [2.7 meters]) but without a condensing unit for the increased flexibility of multiple cold well configurations

Remote models consist of these components shipped loose

Control panel (Shipped loose)

Condensing Unit CWBR-6 with a Condensing Unit (5/8 HP) and control panel (CWBX-6 with a control panel only)

Model CWBR-6 with accessory (hotel) food pans

## Options (available at time of purchase only)

- Additional Four-Year Parts Only Warranty on the Compressor (CWBR only) at Time of Unit Purchase (Not available for export voltages)
