Programmable Multi-Burner Countertop Induction Ranges

Models: IRNG-PHC6-24-3, -PHC6-29-3

The Hatco Programmable Multi-Burner Countertop Induction Range is the only multi-burner programmable induction range of its kind, providing multi-stage cooking control across a single countertop system. Six independently controlled burners execute programmed recipes using time, power level, or temperature setpoints, helping maintain consistent results during service. The system stores up to eight recipes that can be accessed across all burners, allowing operators to standardize execution and repeat results in busy kitchen environments where precision and consistency matter most.

Standard features:

- Advanced programmability allows storage of up to eight recipes, each with up to six cooking stages based on time, power level, or temperature setpoints
- Intuitive LCD control displays step-by-step instructions, alerts, and prompts to simplify operation
- Independent burner performance provides flexible control and consistent output across every cooking zone
- Optional temperature probe compatibility available on front burners for enhanced cooking control
- Precise power adjustment supports repeatable cooking performance across applications
- Digital display provides clear operational visibility during use
- Durable countertop surface designed for high-use environments and routine cleaning

For operation, location and safety information, please refer to the Installation and Operating Manual.
