Hot Tiered Shelf System

Models:

TSS-2H-3919, -2H-5419, -2H-3927, -2H-5427

Hot Tiered Shelf System brings hot food merchandising together in a single, front-of-house display. Two independently controlled shelves allow for multiple hot items to be showcased simultaneously, expanding menu options without adding equipment or occupying extra counter space. Glass side panels and a top enclosure, along with bright LED lighting, enhance product visibility and maintain a clean presentation. The result is a compact merchandising solution designed for high visibility and impulse sales.

Standard features

- Two-tier design with independent temperature controls on each shelf for flexible merchandising options
- Single control operation manages both shelves for simplified temperature adjustment
- Integrated LED lighting on each tier highlights products for improved visibility without adding excess heat
- Stainless steel exterior provides long-lasting durability for busy foodservice environments
- 13" (330 mm) shelf spacing accommodates a range of food pans and packaged items
- Designed to mount directly into virtually any countertop for a clean, built-in look
- Models with simulated stone finishes are Swanstone®
