

7 Reasons Hatco Induction is smarter.

1 **Maximum Beneficial Features** and one of the most reasonably priced in the industry. Follow the path for the features that set Hatco's induction apart

MORE POWER

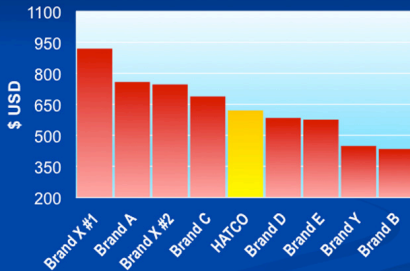

Magnetic Power System (MPS) delivers 10-11% more power than competitors (precise power control of 0 to 100)

10-11% More Power than the Closest Rivals
Average Power to Pan (1800 rated unit)

Great Value for the Money

End-User Net Price

USB port for downloading updates

Pan Sense Technology (PST) which indicates when a suitable pan is placed on the cooktop

EASIER

3 Programmable Modes

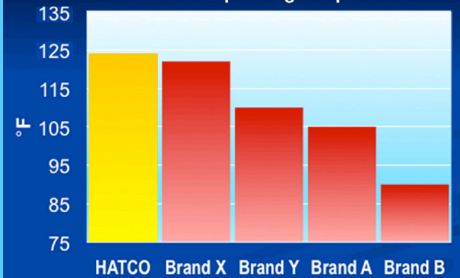

Ability to create preset programs for consistent cooking cycles and a quality assured product (precise temperature (F° or C° with 1 degree increments) and time controls (1 min. to 10 hrs.))

4 COOLER

Greater Operating Temperature despite the kitchen environment, Hatco induction keeps its "cool"

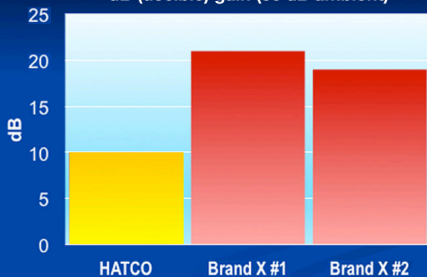

Max Ambient 124°/51°C

Maximum Operating Temperature

+10 dB versus +20 dB

dB (decible) gain (36 dB ambient)

High resolution display

Touch sensitive buttons

5 SAFER

Fully Sealed Top

Keeps pan heat or moisture away from electronics and remains safe if it breaks for any reason (utilizes conformal coated boards which adds additional interior protection from any possibility of moisture and grease)

7

Lower Operating Noise

High-capacity, low speed cooling fan keeps a quieter, less stressful kitchen

QUIETER

Low Profile

One of the lowest profiles, which gives it a much more elegant design

6

LOW PROFILE

Lower Profile than Most of the Market Leaders

Available Soon:

- Modes (like smart phone apps) easily downloaded from our web site
- Additional base color options
- Heavy-duty countertop model
- Built-in professional model
